# Our Cities Are Talking: Who's Listening and Why it Matters

---

Citizens encounter persistent urban issues that require immediate attention and action.

Current communication methods for reporting these problems are outdated and inefficient, leading to **slow responses** and **frustrated citizens**. We need a streamlined solution to close this broken communication loop.

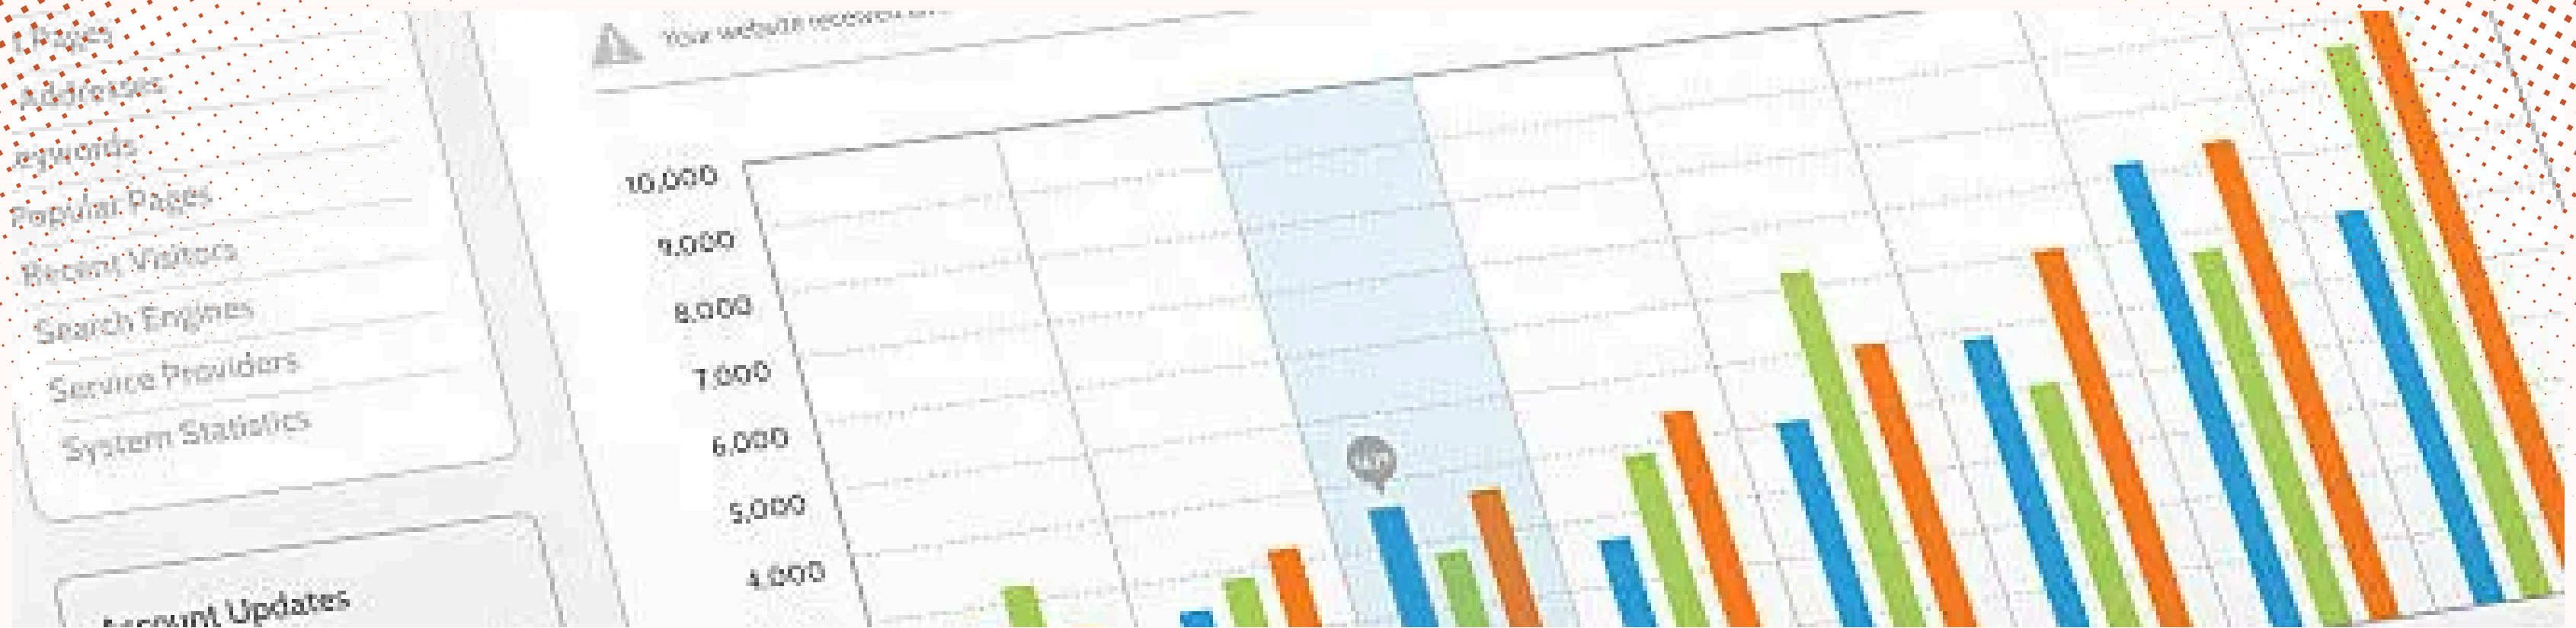

# Introducing CityFix: Your City's Command Center for Efficient Issue Management and Resolution

---

CityFix offers a **centralized platform** for city officials, streamlining the process of managing urban issues.

With CityFix, officials can view, manage, and resolve reports seamlessly, transforming the traditional reporting system into an **intelligent command center** that enhances responsiveness and efficiency in urban governance.

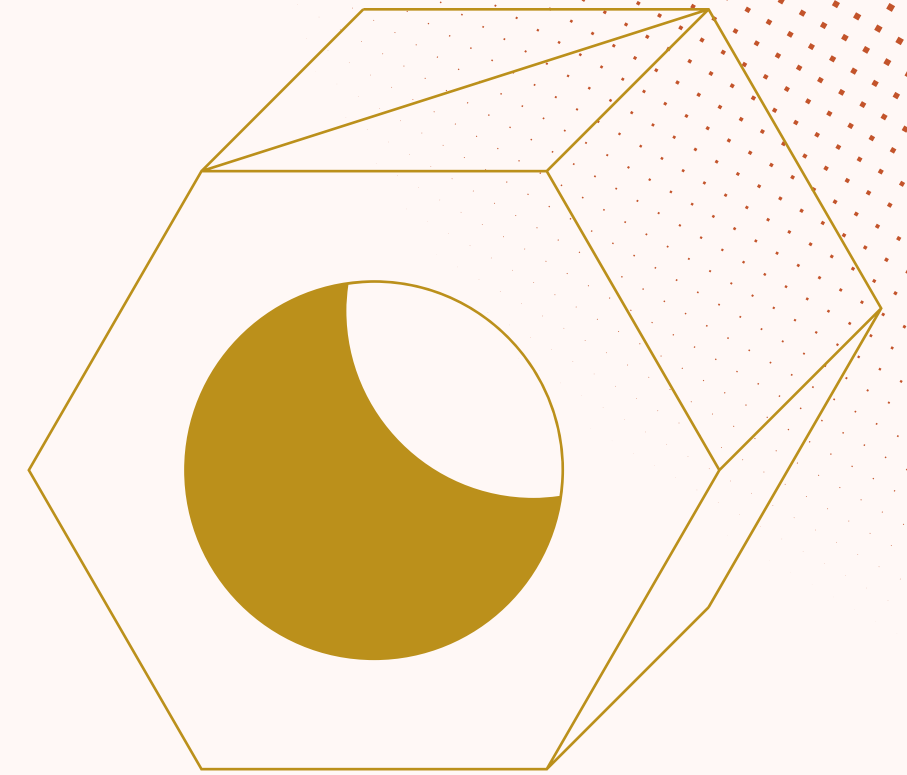

# Dashboard Overview

Experience seamless reporting and management with CityFix's intelligent command center, designed for effective urban solutions.

With CityFix, users can easily navigate through **pending reports** and issues categorized for quick access. The AI Auto-Assign feature intelligently suggests the correct department, ensuring swift resolutions and **live tracking** of status updates.

# Technology Stack Overview

## Frontend: Next.js and React

Next.js and React provide a modern, **responsive frontend** for seamless user experiences.

## Backend: Firebase for data handling

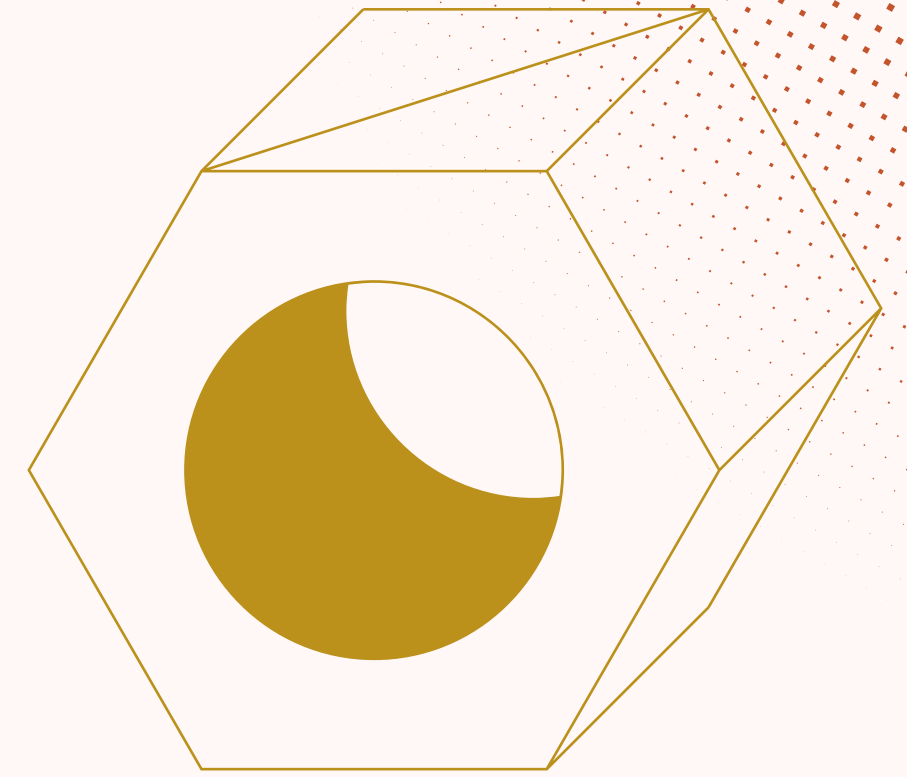

Firebase offers scalable solutions for **real-time database** management and secure user authentication.

## Generative AI: Google Genkit integration

Google Genkit enables **intelligent AI solutions** for dynamic problem-solving and efficient city management.

# Future Enhancements: From Reactive to Proactive

**Live Issue Map to visualize city hotspots**

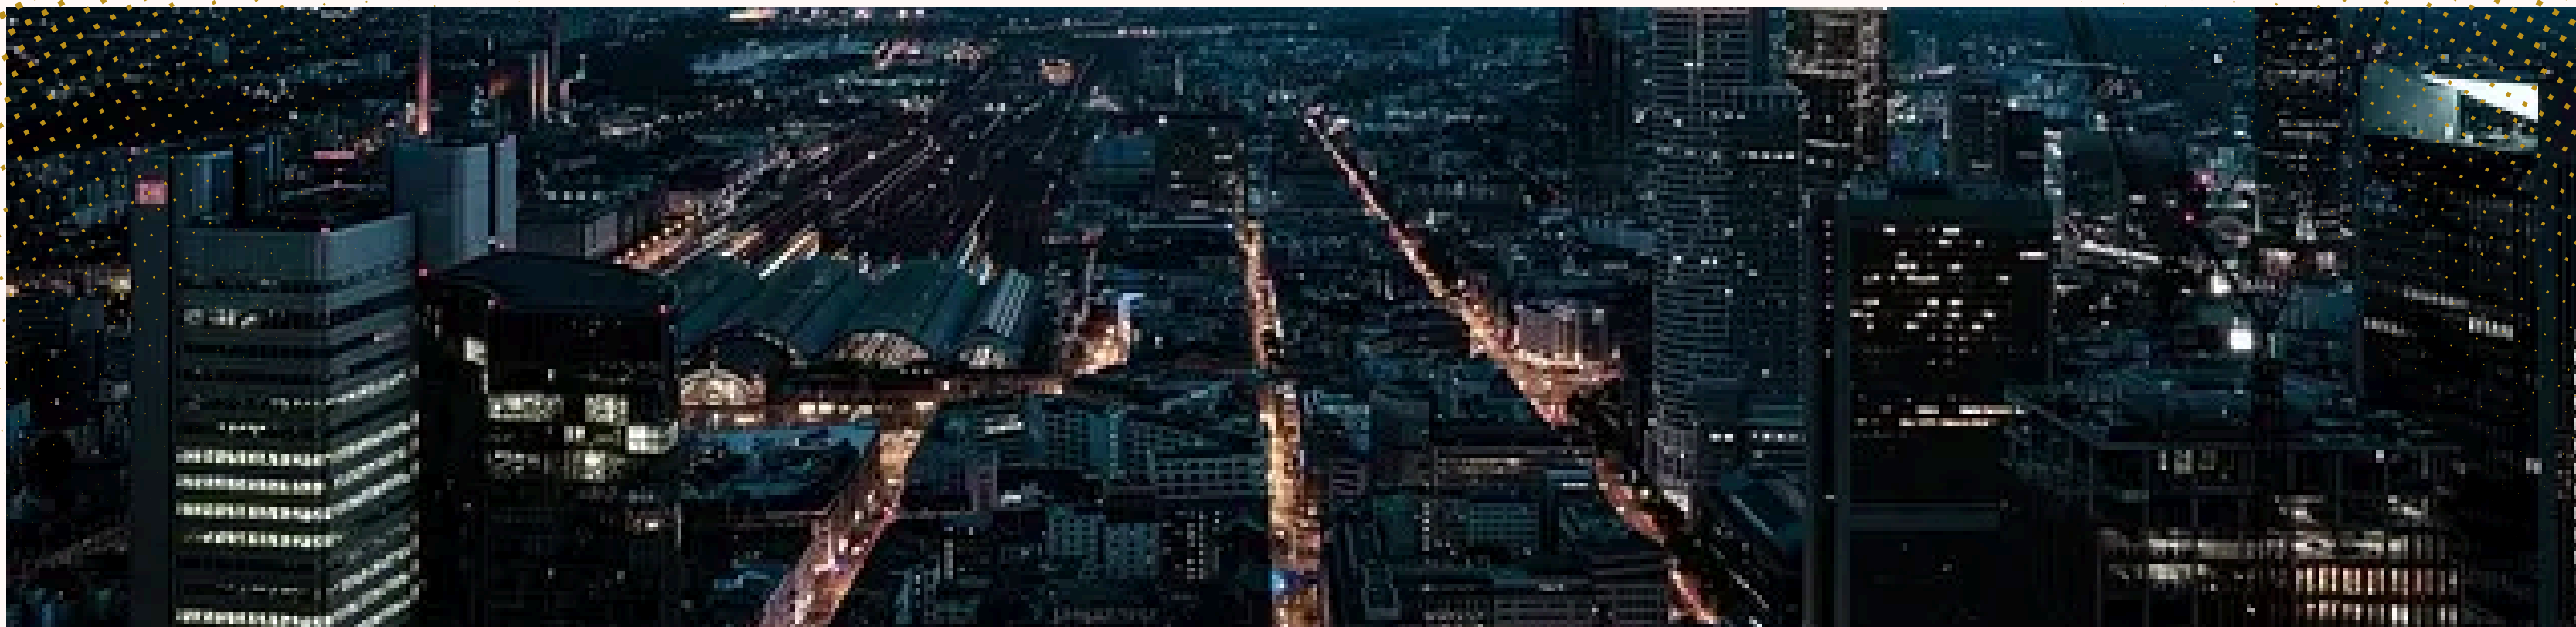

A dynamic map highlighting **real-time urban issues** for efficient resource allocation and response.

**Public Submission Portal for citizen reports**

Citizens can easily report problems, ensuring **immediate attention** to local concerns and needs.

**Predictive Maintenance with AI to forecast problems**

AI-driven insights will **anticipate maintenance needs**, reducing downtime and enhancing city operations.

# Thank You for Your Attention

**CityFix – Innovating the future of urban  
living through technology and collaboration**

We appreciate your interest in CityFix. Together, we can create **responsive cities** that effectively address urban challenges and enhance the quality of life for all citizens.
